It is applied to 40% of sensing distance for BF3RX.

\* (Note2) Min. sensing target is a value measured opaque material in accurate output status and the sensing distance is different with the rated sensing distance (Note1).

\* (Note3) Fiber optic cable out of the rated length can be customizable.

\* **Free cut** The sensing distance can be shortened about max. 20% than the normal according to condition of the cable.
